Swine/Swine MAX

家禽用  
Poultry

Complex functional mineral product for growth and environment

Minerals are essential nutrients to sustain the lives of animals. Over supplemented zinc and copper would make animal's feces hazardous to the environment. NISMIN not only Improves animal growth but also cares about the environment with accurately formulated zinc and copper concentration.

# 蜜樂酪®

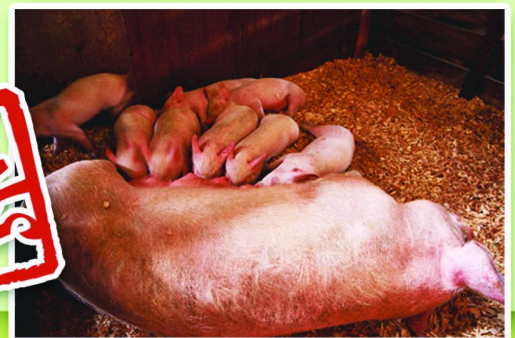

Nismin

- **Formula** Meet animal's production and physiological requirement with optimum mineral nutrition.
- **Convenience** Nismin is all you need for minerals in the feed.
- **Traceability** All source ingredients be traced back by Datastor production and management software to ensure product safety and quality.

## ■ Nismin for swine MAX can:

- Enhance carcass quality with increasing lean meat
- Improve feed efficiency to reach market size faster
- Boost immunity against diseases
- Increase productivity of sow, shorten heat period
