

Raw Material

Product Description

Scallop Liver Powder Made of scallop liver, dried and made into powder form. Consist of essential nutrients, rich in free amino acid and HUFA, used to increase the flavor of aquaculture feed. It is especially used as an additive for fish, eel and shrimp serving as flavoring, and feed attractant. It has good performance in growth as well. The mature gonad in the scallop contains excellent marine fatty acids and other UGF elements.

Furthermore, Scallop of the best quality can be obtained from April to October in Japan. Processing factory in Hokkaido used only the best quality scallop to produce this product, the freshness is therefore guaranteed.

Using this product in feed, it brings overall benefits.

Specifications & Usage

Origin: Hokkaido Island, Japan (famous shellfish origin)

Appearance: Light green-brown color meal

Composition:

Crude Protein (N x 6.25)	≥ 50%
Crude Fat	≥ 10%
Moisture	≤ 10%
Ash	≤ 20%

Usage: Excellent additives for aquatic feed
suggested dosage is 5% of feed

Antioxidant: Ethoxyquin is added before drying process takes place
(300mg/kg. Depending on the basic fat content)

Packing: 1 ton/bulk bag and 23±10% tons per 40-feet container

Storage: Store in dry and ventilated area
Avoid exposure to sunlight and high temperature
